ENIRGI GROUP LITHIUM PROCESSING PLANT COMPLETES FIRST MILESTONE

To our Dajin Shareholders and Interested Investors:

April 20, 2017 - Vancouver, BC – Dajin Resource Corp. (“Dajin”) (TSX-V: DJI) (OTC: DJIFF) (Germany: C2U1) would like to make you aware of news released on April 17th, 2017. In Argentina, Enirgi Group, the Operator for Dajin’s partnership with LSC Lithium Corporation (TSX-V: LSC) has just announced achieving a major milestone at the Salar del Rincon Lithium Brine Processing plant. The plant, using Enirgi’s state of the art Direct Extraction Technology (DXP) has achieved successful commissioning of the first section (the “Separation Stage”) of its commercial scale demonstration Lithium carbonate processing plant. This work has been accomplished in approximately nine months. Enirgi’s reports that that the plant will achieve full commissioning by the end of May 2017, with Monday’s announcement being the first to highlight the significant advances the company is making with its technology as it ramps up to commercial production.

Dajin is very pleased with the progress being made in Argentina. After LSC was launched publicly February 28th, 2017, it has made a number of announcements including a March 29th, 2017 press release regarding a transaction with Orocobre Limited (Orocobre) and lithium explorer and developer Advantage Lithium Corp. for the purchase of concessions in the Salinas Grandes salar. This transaction positions LSC to control this very significant strategic asset of which Dajin’s properties are an important part. On April 4th, 2017 LSC announced the historical resource estimates verified in a National Instrument 43 -101 report released by Orocobre in 2013. The reported brine chemistry for Salinas Grandes salar as detailed in the Orocobre report, is highly favourable for lithium and potash production, being low in both sulphates and magnesium and unsaturated in potassium. Pending the completion of the announced transactions, LSC will have a land package portfolio totaling over 295,000 hectares, which represents extensive lithium prospective salar holdings in Argentina. Of this land package Dajin’s contribution is over 93,000 hectares.

LSC’s April 17th, 2017 press release can be viewed by [clicking here](#).

About Dajin: (www.dajin.ca)

Dajin is an early stage Lithium exploration company holding a 100% interest in 403 placer claims covering 7,914 acres (3,202 hectares) in the Teels Marsh region of Mineral County, Nevada. These claims are known to contain Lithium and Boron values and are adjacent to the birth place of US Borax Corp’s first borax mine. Dajin also holds a 100% interest in 191 placer claims covering 3,851 acres (1,558 hectares) in the Alkali Lake region of Esmeralda County, Nevada, located 7 miles (11 kilometers) northeast of Albemarle Holding’s Silver Peak Lithium brine operation in Clayton Valley.

Dajin, through Dajin Resources S.A. (Dajin S.A.), holds concessions or concession applications in Jujuy Province, Argentina that were acquired in regions known to contain brines with Lithium, Potassium, and Boron values. These concessions exceed 93,000 hectares (230,000 acres) and are primarily located in the Salinas Grandes/Guayatayoc salt lakes basin. Dajin S.A. is partnered with LSC Lithium Corporation who has agreed to spend \$2,000,000 to earn a 51% interest in Dajin S.A.’s Lithium properties while building a significant presence in Argentina.
