## **ENIRGI GROUP PRODUCES LITHIUM CARBONATE AT DXP PROCESSING PLANT**

### **To our Dajin Shareholders and Interested Investors:**

**June 1, 2017 - Vancouver, BC** – Dajin Resources Corp. (“Dajin”) (TSX-V: DJI) (OTC: DJIFF) (Germany: C2U1) would like to make you aware of news released on May 29<sup>th</sup> by LSC Lithium Corporation, regarding their strategic partner, Enirgi Group Corporation. Enirgi has achieved another milestone in bringing their Direct Extraction Technology (DXP) plant on-line in Salar del Rincon in Salta, Argentina. In April they announced the successful commissioning of the first section (the “Separation Stage”) of its commercial scale demonstration Lithium carbonate processing plant, and are now producing Lithium carbonate on a daily basis. LSC reports that they are “very pleased with the rapid ramp-up progress and success made”. They also point out that the Lithium carbonate being produced is from raw, unconcentrated brine in less than 24 hours.

The update from LSC and Enirgi, is excellent news for Argentina Lithium production in general. With the plant functioning LSC will be able to start to test brines from its various salars including Salinas Grandes to see how they respond to the process. Each salar has slightly different chemistry, so pre-testing will be helpful in streamlining the development process and decision making as LSC expands its operations. LSC now controls over 300,000 hectares of which Dajin has contributed more than 93,000 hectares. Dajin directors, Catherine Hickson and Mark Coolbaugh will be visiting the plant in the coming week to view firsthand the progress Enirgi has made.

### **About Dajin: ([www.dajin.ca](http://www.dajin.ca))**

Dajin is an early stage Lithium exploration company holding a 100% interest in 403 placer claims covering 7,914 acres (3,202 hectares) in the Teels Marsh region of Mineral County, Nevada. These claims are known to contain Lithium and Boron values and are adjacent to the birth place of US Borax Corp’s first borax mine. Dajin also holds a 100% interest in 191 placer claims covering 3,851 acres (1,558 hectares) in the Alkali Lake region of Esmeralda County, Nevada, located 7 miles (11 kilometers) northeast of Albemarle Holding’s Silver Peak Lithium brine operation in Clayton Valley.

Dajin, through Dajin Resources S.A. (Dajin S.A.), holds concessions or concession applications in Jujuy Province, Argentina that were acquired in regions known to contain brines with Lithium, Potassium, and Boron values. These concessions exceed 93,000 hectares (230,000 acres) and are primarily located in the Salinas Grandes/Guayatayoc salt lakes basin. Dajin S.A. is partnered with LSC Lithium Corporation who has agreed to spend \$2,000,000 to earn a 51% interest in Dajin S.A.’s Lithium properties while building a significant presence in Argentina.
